

## **Joint Steering Committee Communication**

4/29/25

At today's Joint Steering Committee meeting between the Company and the Unions, the Company notified the Unions that the Company will be making an application this week to the California Public Utility Commission seeking to close all 43 branch office payment locations. This will be a separate application outside of the General Rate Case.

The Unions notified the Company that our position continues to be that the Branch Offices are vital to serving the public and that we will fight to keep all the Branch Offices open and keep the jobs for our members and to service and support the public, especially the underserved communities that rely on the Branch Offices. We will not be partnering with the Company in any way to assist the Company in closing the Branch Offices and will use every resource at our disposal to keep the Branch Offices open.
