# CPUC Voting Meeting G-3605

8/26/25

CPUC voting meeting with public comment on G-3605 (Southern California Gas Company's 2024 Compliance Plan, Forecasts, and Caps for Its Natural Gas Leak Abatement Program) is scheduled for 8/28/25 via phone line for public comment or viewable via webcast.

Resolution G-3605 requests funds that were not recovered in previous resolutions for leak abatement and funds needed in 2025/2026 to continue efforts in cutting emissions as mandated by SB1383/SB1371. As stated in Comments from UWUA Local 132 in regard to resolution G-3605 that SoCalGas has made a significant effort to cut down emission and leak inventory by way of increased surveys and expedited repairs. SoCal Gas has used cutting edge technology like Aerial Methane Mapping which can be used to find leakage on consumer pipelines or emissions from faulty appliances which can be corrected by a highly trained SoCalGas technicians that wouldn't normally be found on normal leak survey. SB1371 authorized the CPUC to provide "maximum technologically feasible and cost-effective reduction of methane emissions from CPUC-regulated gas facilities". This in fact has been shown by SoCalGas over the last 10 years powered by Union Labor, cutting funds when we are just short 5 years of the 2030 mark would be cutting public safety at the knees. We urge everyone that values safety to voice their opinions in support of the full proposed funding to not only guarantee the continued efforts toward our goal of reducing emission by 40% by 2030 but also save highly valued labor jobs.
